

Professional Nails, Cakes & Hobbies Airbrush Kit

All our compressors have copper wound motors for cooler running and are longer lasting than cheaper aluminium versions.

Before we stocked any product, samples are tested for a long time to see how they work on actual models and only then do we approve final production & our brand name is put on the airbrush & compressors.

Random checks are done to make sure items are up to specification, together with them being in regular use by our team.

KIT COMPRISES OF :_

AS18-2 COMPRESSOR : - Single cylinder piston type giving constant pressure. Low noise, thermally protected & auto release pressure & re-start function. Adjustable air pressure regulator with 1/8" male connector.

BD-128 AIRBRUSH :- Good all round airbrush for your primers, base coats & large areas that require painting. Has a 0.35mm nozzle that will still allow you to do detailed work if required.

BD-134K AIRBRUSH :- This is one of our best selling airbrushes that has received very good reviews in the printed & social media. This airbrush comes supplied with 3 needle/nozzle combinations from the wider 0.5mm up to an ultra fine 0.2mm that will give you the ability to do from background to very fine work with ease.

Comes with a 22cc glass jar & also an adjustable 7cc metal cup allowing you to spray in many different angles to get the effect you wish.
